Doktorarbeiten 2003 - 2023
PhD theses 2003 - 2023

2023

Simon Cloutier, Investigations of the solar dynamo within the framework of the Babcock-Leighton mechanism. Georg-August-Universität Göttingen, 2023.

Yara De Leo, The in-flight radiometric calibration of the Metis coronagraph on-board Solar Orbiter. First results from calibrated images. Università di Catania, 2023.

Argyrios Sotirios Koumtzis, Global scale magnetic field extrapolation in the solar corona using a Yin Yang grid. Georg-August-Universität Göttingen, 2023.

Jorge Pablo Lemos Velázquez, Distribution and dynamics of aggregates in the coma of 67P/Churyumov-Gerasimenko. Technische Universität Braunschweig, 2023.

Björn Müller, Iterative helioseismic holography. Georg-August-Universität Göttingen, 2023.

Matthias Christian Alexander Nieuwenhuis, The Distribution of Water in the Lunar Magmatic Ocean. Georg-August-Universität Göttingen, 2023.

Paula Naomi Wulff, Numerical Modelling of Zonal Winds on Gas Giants. Georg-August-Universität Göttingen, 2023.

2022

Tanayveer Singh Bhatia, Small-scale dynamo in cool-main sequence stars. Georg-August-Universität Göttingen, 2022.

Yuto Bekki, Theory of Solar Oscillations in the Inertial Frequency Range. Georg-August-Universität Göttingen, 2022.

Cosima Breu, A Coronal loop in a box: From energy generation to coronal emission. Georg-August-Universität Göttingen, 2022.

J. Sebastian Castellanos Duran, Strong magnetic fields and unusual flows in sunspots. Georg-August-Universität Göttingen, 2022.

Sebastian Höfner, The role of fractured terrain on comet 67P for nucleus thermophysics and activity. Technische Universität Braunschweig, 2022.

Bernhard Hofer, Modelling the evolution of small bipolar regions on the Sun. Georg-August-Universität Göttingen, 2022.

Rakshit Joshi, Single-station inversion of seismic data for the InSight mission to Mars. Ludwig-Maximilians-Universität München, 2022.

Kamal Sant, CMOS Sensors and Polarimetric Studies of the Sun. Technische Universität Braunschweig, 2022.

2021

Christian Baumgartner, The tilt and twist of emerging solar active regions. Georg-August-Universität Göttingen, 2021.

Valentin Tertius Bickel, Analysis of Lunar Rockfalls. ETH Zurich, 2021.

Meike Fischer, Triple oxygen isotope study on the Earth-Moon system. Georg-August-Universität Göttingen, 2021.

Nils Gottschling, Solar surface flows during active region emergence. Georg-August-Universität Göttingen, 2021.

Nina-Elisabeth Nemec, Exploring the solar paradigm to explain stellar variability. Georg-August-Universität Göttingen, 2021.

Paul-Louis Poulrier, Helioseismic diagnostics of solar surface dynamics. Georg-August-Universität Göttingen, 2021. Georg-August-Universität Göttingen, 2021.

Ameya Prabhu, Towards constraining the solar dynamo with observational studies of the Sun's magnetic field. Georg-August-Universität Göttingen, 2021.

Janosch Preuß, Learned infinite elements for helioseismology. Georg-August-Universität Göttingen, 2021.

Sudharshan Saranathan, Analysis of solar faculae using stray-light-corrected spectropolarimetric data and numerical simulations. Georg-August-Universität Göttingen, 2021.

Xin Yao, Kinetic simulation of radio emissions due to magnetic reconnection in the solar corona. Technische Universität Berlin, 2021.

Juxhin Zhuleku, Modelling the corona of stars more active than the Sun using 3D MHD simulations. Georg-August-Universität Göttingen, 2021.

2020

Eliana Amazo Gomez, Understanding brightness variations of Sun-like stars on timescales of stellar rotation. Georg-August-Universität Göttingen, 2020.

Felix Mackebrandt, Timing of stellar pulsations to search for sub-stellar companions beyond the main sequence. Georg-August-Universität Göttingen, 2020.

Mayukh Panja, Realistic MHD simulations of spots on cool main-sequence stars. Georg-August-Universität Göttingen, 2020.

Bastian Proxauf, Observations of large-scale solar flows. Georg-August-Universität Göttingen, 2020.

Majid Pourabdian, Inverse Problems in Local Helioseismology. Georg-August-Universität Göttingen, 2020.

Robin Thor, Extracting tides from laser altimetry observations: A global approach. Technische Universität Berlin, 2020.

Mariangela Viviani, Global magneto-convection models of stars with varying rotation rate. Georg-August-Universität Göttingen, 2020.

Franziska Zeuner, High resolution scattering spectropolarimetry of the quiet solar photosphere. Georg-August-Universität Göttingen, 2020.

2019

Stephan Barra, Coronal active Region modeling based on SDO data, Ruhr-Universität Bochum, 2019.

Fatima Kahil, Brightness Contrast of Solar Magnetic Elements Observed by Sunrise. Georg-August-Universität Göttingen, 2019.

Manuel Reinhardt, Assessing the formation and preservation of organic signatures in extreme environments. Georg-August-Universität Göttingen, 2019.

Kai Oliver Rodenbeck, On the Detection of Exomoons in Photometric Time Series. Georg-August-Universität Göttingen, 2019.

Birko-Katarina Ruzicka, Layerings in the nucleus of comet 67P/Churyumov-Gerasimenko. Georg-August-Universität Göttingen, 2019.

2018

Gesa Becker, Crustal thickness from seismic noise correlations in preparation for the InSight mission to Mars. Georg-August-Universität Göttingen, 2018.

Earl Bellinger, Inverse Problems in Asteroseismology. Georg-August-Universität Göttingen, 2018.

German Fernandez Rico, Quasi-autonomous Spacecraft Thermal Model Reduction. Universidad Politécnica de Madrid, Spain, 2018.

Hans Huybrighs, A Search for signatures of Europa's atmosphere and plumes in Galileo charged particle data. Technische Universität Braunschweig, 2018.

Rosita Kokotanekova, Bulk Properties and Evolution of Jupiter-Family Comet Nuclei, The Open University, Milton Keynes, UK, 2018.

Ricardo Jorge Maranhas Gafeira, Slender Ca II H fibrils observed by SUNRISE/SuFI. Georg-August-Universität Göttingen, 2018.

David Marshall, Analysis of MIRO/Rosetta Data. Georg-August-Universität Göttingen, 2018.

Helge Mißbach, Formation and preservation of abiotic organic signatures vs. lipid biomarkers—experimental studies in preparation for the ExoMars 2020 mission. Georg-August-Universität Göttingen, 2018.

Tanja Schäfer, Experimental hydrothermal alteration of carbonaceous chondrites and their meaning for Ceres' brine composition. Technische Universität Clausthal, 2018.

Azaymi Litzi Siu Tapia, Normal and counter Evershed flows in the penumbra of sunspots: HINODE observations and MHD simulations. Georg-August-Universität Göttingen, 2018.

Nathalie Themeßl, Asteroseismic inferences from red-giant stars. Georg-August-Universität Göttingen, 2018.

Chi-Ju Wu, Solar variability over the last 9000 years. Georg-August-Universität Göttingen, 2018.

Dan Yang, Modeling experiments in helioseismic holography. Georg-August-Universität Göttingen, 2018.

2017

Krzysztof Barczynski, Small-scale structures in the upper atmosphere of the Sun. Georg-August-Universität Göttingen, 2017.

- Atefeh Barekat**, Studies of the radial gradient of rotation near the solar surface. Georg-August-Universität Göttingen, 2017.
- Ankit Barik**, Inertial modes, turbulence and magnetic effects in a differentially rotating spherical shell. Georg-August-Universität Göttingen, 2017.
- Theodosios Chatzistergos**, Analysis of historical Ca II spectroheliogrammes and long-term changes in solar irradiance. Georg-August-Universität Göttingen, 2017.
- Suzana de Souza e Almeida Silva**, On the influence of nonlocal heat flux on energy transport and balance in the solar atmosphere. National Institute for Space Research, Brazil, 2017.
- Xuanyu Hu**, Observing and modeling water activity and surface changes over dust cover on 67P/Churyumov-Gerasimenko. Technische Universität Braunschweig, 2017.
- Sebastian Lorek**, Comet Formation in the Framework of Streaming Instability. Technische Universität Braunschweig, 2017.
- David Martin Belda**, Non-axisymmetric magnetic flux transport in the Sun. Georg-August-Universität Göttingen, 2017.
- Benjamin Palmaerts**, Multi-instrument study of the hourly pulsations in Saturn's magnetosphere. Georg-August-Universität Göttingen & Université de Liège, Belgium, 2017.

2016

- Philip Grete**, Large eddy simulations of compressible magnetohydrodynamic turbulence. Georg-August Universität Göttingen, 2016.
- Franciso Andrés Iglesias**, Development of a high-cadence, high-precision solar imaging polarimeter with application to the FSP prototype. Technische Universität Braunschweig, 2016.
- Anna Kotova**, Energetic charged particles tracing techniques and their application in the magnetosphere of Saturn. Université de Toulouse, France, 2016.
- Martin Bo Nielsen**, Differential rotation in Sun-like stars from surface variability and asteroseismology. Georg-August Universität Göttingen, 2016.
- Leonardo Regoli**, Titan's interaction with the Saturnian magnetosphere, University College London, UK, 2016.
- Fabien Widmer**, Magnetohydrodynamic Simulation of Reconnection in Turbulent Astrophysical Plasmas. Georg-August Universität Göttingen, 2016.
- Xiaowei Zhou**, Electron acceleration by cascading reconnection in the solar corona: test particle calculation. CAS Nanjing (PMO), China, 2016..

2015

- Raphael Attie**, The relationship between supergranulation flows, magnetic field evolution and network flares. Technische Universität Braunschweig, 2015.
- Jack Carlyle**, Mass and Magnetic Field of Eruptive Solar Filaments. University College London, U. K., 2015.

- Feng Chen**, Coronal dynamics driven by magnetic flux emergence. Georg-August Universität Göttingen, 2015.
- Julia Chifu**, Multi-spacecraft analysis of the solar coronal plasma. Technische Universität Braunschweig, 2015.
- Jakob Deller**, Hyper-Velocity Impacts on Rubble Pile Asteroids. University of Kent, U. K., 2015.
- Jan Langfellner**, Measuring vortical flows in the solar interior. Georg-August Universität Göttingen, 2015.
- Björn Löptien**, Data Compression for Helioseismology. Georg-August Universität Göttingen, 2015.
- Nafiseh Masoumzadeh Jouzdani**, Surface Reflectance Analysis of small bodies on the different scales. Georg-August Universität Göttingen, 2015.
- Patricio Munoz Sepulveda**, Fully kinetic PiC simulations of current sheet instabilities for the Solar corona. Georg-August Universität Göttingen, 2015.
- Emanuele Papini**, Simulating the signature of starspots in stellar oscillations. Georg-August Universität Göttingen, 2015.
- Farhad Shakeri**, Cycle-related solar VUV variability. Georg-August Universität Göttingen, 2015.
- Guneshwar Singh Thangjam**, Mineralogy and geology of (4) Vesta from Dawn Framing Camera. Technische Universität Clausthal, 2015.
- Rakesh Yadav**, Effect of Density Stratification on Dynamos in Gas Planets and Low-Mass Stars. Georg-August Universität Göttingen, 2015.

2014

- J. Ajitha Sethunadh**, Three-dimensional modeling of the stratospheres of gas giants. Technische Universität Berlin, 2014.
- M. Andriopoulou**, Energetic charged particle kinematics in Saturn's inner magnetosphere. Technische Universität Braunschweig, 2014.
- B. Beeck**, Simulations of magnetoconvection in cool stars. Georg-August Universität Göttingen, 2014.
- L. Duarte**, Dynamics and Magnetic Field Generation in Jupiter and Saturn. Technische Universität Braunschweig, 2014.
- C. Giri**, La composition organique d'un noyau cométaire, l'instrument COSAC sur la sonde Philae. Université de Nice - Sophia Antipolis, 2014.
- M. Hofmann**, Dynamics of Granular Material on Small Bodies. Technische Universität Braunschweig, 2014.
- J. Joshi**, Magnetic and velocity field of sunspots in photosphere and upper chromosphere. Technische Universität Braunschweig, 2014.
- D. Meduri**, Statistical study of magnetic field reversals in geodynamo models and paleomagnetic data. Georg-August Universität Göttingen, 2014.
- K. L. Yeo**, Analysis and modeling of solar irradiance variations. Technische Universität Braunschweig, 2014.

2013

- P.-A. Bourdin**, Coronal structure and evolution in 3D numerical experiments. Georg-August-Universität Göttingen, 2013.
- D. Bühler**, Analysis of small scale magnetic fields using Hinode SOT/SP. Georg-August-Universität Göttingen, 2013.
- L. Chai**, Low-frequency Waves in Magnetic Reconnection and Solitary Kinetic Alfvén Waves in Adiabatic Process. Hefei University (China), 2013.
- N. Dadashi**, Diagnostic of the solar transition region and corona from VUV spectroscopy and imaging. Technische Universität Braunschweig, 2013.
- S. Jafarzadeh**, Dynamics of magnetic bright points in the lower solar atmosphere. Georg-August-Universität Göttingen, 2013.
- L. Kun**, Study on magnetospheric cold ion outflow, Center for Space Science and Applied Research. Chinese Academy of Sciences, Nanjing, 2013.
- J. J. Piqueras Meseguer**, Design and optimization of a space camera with application to the PHI solar magnetograph. Technische Universität Braunschweig, 2013.
- T. Riethmüller**, Investigations of small-scale magnetic features on the solar surface. Technische Universität Braunschweig, 2013.
- J. A. Sanchez**, Temperature-induced effects and phase reddening on near-Earth asteroids. Westfälischen Wilhelms-Universität Münster, 2013.
- E. Shalygin**, Study of the Venus surface and lower atmosphere using VMC images. Technische Universität Braunschweig, 2013.
- T. van Wettum**, Comparison of 3D coronal models to solar VUV observations. Georg-August-Universität Göttingen, 2013.

2012

- W. Dietrich**, The hemispherical magnetic field of ancient Mars - numerical simulations and geophysical constraints. Georg-August-Universität Göttingen, 2012.
- P. Kollmann**, Sources, sinks, and transport of energetic particles within Saturn's magnetosphere. Technische Universität Braunschweig, 2012.
- Y. J. Lee**, Venus cloud structure and radiative energy balance of the mesosphere. Technische Universität Braunschweig, 2012.
- M. U. Bhatt**, Mineralogical analysis and iron abundance estimation of the Moon using the SIR-2 and other VIS-NIR spectrometers on-board the lunar orbiter Chandrayaan-1. Technische Universität Clausthal, 2012.
- D. Verscharen**, On convected wave structures and spectral transfer in space plasmas – applications to solar corona and solar wind. Technische Universität Braunschweig, 2012.

2011

- A. Angsmann**, Magnetic states of the ionosphere of Venus observed by Venus Express. Technische Universität Braunschweig, 2011.

- J. de Patoul**, Stereoscopy and tomography of coronal structures. Technische Universität Braunschweig, 2011.
- M. R. El Maarry**, Searching for Hydrothermal Systems on Mars using Remote Sensing. Georg-August-Universität Göttingen, 2011.
- M. Dasi Espuig**, Solar variability: A new proxy and models of solar irradiance variations. Technische Universität Braunschweig, 2011.
- K. Hallgren**, Mesospheric water vapor — Variability at different timescales observed by ground-based microwave spectroscopy. Universität Rostock, 2011.
- S. Javadi**, Numerical simulation of the heating of x-ray bright points in the solar corona. Georg-August-Universität Göttingen, 2011.
- A. L. Müller**, Energetic particle injection events in the Kronian magnetosphere: applications and properties. Universität zu Köln, 2011.
- N. Ookay**, Spectropolarimetric investigations of the deep photospheric layers of solar magnetic structurex. Georg-August-Universität Göttingen, 2011.
- T. Stahn**, Analysis of time series of solar-like oscillations - Applications to the Sun and HD 52265. Georg-August-Universität Göttingen, 2011.
- T. Tadesse Asfaw**, Nonlinear force-free reconstruction of the coronal magnetic field with advanced numerical methods. Georg-August-Universität Göttingen, 2011.

2010

- M. Drahus**, Microwave observations and modeling of the molecular coma in comets. Georg-August-Universität Göttingen, 2010.
- P. Kobel**, Center-to-limb investigations of solar photospheric magnetic features at high spatial resolution. Georg-August-Universität Göttingen, 2010.
- X. Li**, Development of RAC devices fabricated using e-beam lithography for Chirp Transform Spectrometers. Albert-Ludwigs-Universität Freiburg, 2010.
- M. Lippi**, The composition of cometary ices as inferred from measured production rates of volatiles. Technische Universität Braunschweig, 2010.
- Y. G. Maneva**, Generation and dissipation of Alfvén-cyclotron turbulence in the solar corona and solar wind and related ion differential heating and acceleration. Georg-August-Universität Göttingen, 2010.
- A. Piccialli**, Cyclostrophic wind in the mesosphere of Venus from Venus Express observations. Technische Universität Braunschweig, 2010.
- J. K. Thalmann**, Evolution of coronal magnetic fields. Technische Universität Braunschweig, 2010.
- J.-B. Vincent**, From observations and measurements to realistic modeling of cometary nuclei. Technische Universität Braunschweig, 2010.

2009

- S. Bourouaine**, Kinetic modeling of coronal loops and wave-particle interactions. Georg-August-Universität Göttingen, 2009.
- S. Danilovic**, Magnetic fine structure in the solar photosphere: observations and MHD, Georg-August-Universität Göttingen, 2009.
- L. Feng**, Stereoscopic reconstructions of coronal loops and polar plumes. Georg-August-Universität Göttingen, 2009.
- G. Kleindienst**, Untersuchung von quasiperiodischer ULF-Wellenaktivität in der Saturnmagnetosphäre. Georg-August-Universität Göttingen, 2009.
- Ph. Kobel**, Center-to-limb investigations of solar photospheric magnetic features at high spatial resolution. Georg-August-Universität Göttingen, 2009.
- C. Koch**, Extraction of Mercury's tidal signal and libration amplitude from synthetic laser altimeter data sets. Gottfried Wilhelm Leibniz Universität Hannover, 2009.
- Aline de Lucas**, Multi-spacecraft study of spatial shock front extent in the inner heliosphere. Instituto Nacional de Pesquisas Espaciais, São José dos Campos, 2009.
- S. Protopapa**, Surface characterization of Pluto, Charon, and (47171) 1999 TC36. Technische Universität Braunschweig, 2009.
- P. Ruan**, Magnetic field extrapolation in the solar corona and observations of a flux rope in the solar wind. Georg-August-Universität Göttingen, 2009.
- S. Spjuth**, Disk-resolved photometry of small bodies. Technische Universität Braunschweig, 2009.
- E. Vilenius**, On the analysis of near-infrared point spectrometer data for the investigation of lunar surface mineralogy. Georg-August-Universität Göttingen, 2009.
- M. Wiese**, Lunar mineralogy with SIR-1 and Clementine UVIS/NIR. Georg-August-Universität Göttingen, 2009.
- S. Yang**, Magnetic helicity research of emerging active regions. Chinese Academy of Sciences, Beijing, 2009.

2008

- J. Blanco Rodríguez**, Magnetic Activity at the Poles of the Sun. Georg-August-Universität Göttingen, 2008.
- A. Bößwetter**, Wechselwirkung des Mars mit dem Sonnenwind: Hybrid-Simulationen mit besonderem Bezug zur Wasserbilanz. Technische Universität Braunschweig, 2008.
- E. Isik**, Magnetic flux generation and transport in cool stars. Georg-August-Universität Göttingen, 2008.
- K. W. Lee**, Collisionless Transport of Energetic Electrons in the Solar Corona. National Central University, Taoyuan, 2008.
- L. Maltagliati**, Investigation of the Martian atmospheric water cycle by the OMEGA mapping spectrometer onboard Mars Express. Technische Universität Braunschweig, 2008.
- C. Martinecz**, The Venus plasma environment: a comparison of Venus Express ASPERA-4 measurements with 3D hybrid simulations. Technische Universität Braunschweig, 2008.

- L. Matloch**, Modeling of Solar Mesogranulation. Georg-August-Universität Göttingen, 2008.
- R. Moissl**, Morphology and dynamics of the Venus atmosphere at the cloud top level as observed by the Venus Monitoring Camera. Technische Universität Braunschweig, 2008.
- L. Paganini**, Power spectral density accuracy in chirp transform spectrometers. Albert-Ludwigs-Universität Freiburg, 2008.
- E. Roussos**, Interactions of weakly or non-magnetized bodies with solar system plasmas: Mars and the moons of Saturn. Technische Universität Braunschweig, 2008.
- B. Sánchez-Andrade Nuño**, Observations, analysis and interpretation with non-LTE of chromospheric structures of the sun. Georg-August-Universität Göttingen, 2008.
- J. C. Santos**, Three dimensional Magnetohydrodynamic Simulations of Solar Bright Points. Instituto Nacional de Pesquisas Espaciais, São José dos Campos, 2008.
- C. Sasso**, Spectro-polarimetry of the solar chromosphere in the He I 10830 Å lines. Georg-August-Universität Göttingen, 2008.
- Sebastian Schäfer**, Spatial and temporal structure of Alfvén resonator waves at the terrestrial plasmopause. Technische Universität Braunschweig, 2008.
- C. Tubiana**, Characterization of the physical properties of the ROSETTA target comet 67P/Churyumov-Gerasimenko, Diplomarbeit. Technische Universität Braunschweig, 2008.
- L. Yelles Chaouche**, Observational diagnostics of 3D radiation-MHD simulations of solar and stellar atmospheres. Georg-August-Universität Göttingen, 2008.

2007

- L. A. Balmaceda**, Solar variability and solar irradiance reconstructions on time scales of decades to centuries. Technische Universität Braunschweig, 2007.
- D. Constantinescu**, Wave Sources and Structures in the Earth's Magnetosheath and Adjacent Regions. Technische Universität Braunschweig, 2007.
- R. Mecheri**, Coronal waves and instabilities within the multi-fluid description. Georg-August-Universität Göttingen, 2007.
- E. V. Panov**, Investigation of the current sheets at the outer boundary of the Earth's magnetosphere using the four Cluster spacecraft. Space Research Institute, Moscow, 2007.
- S. E. Schröder**, Investigating the surface of Titan with the descent imager/spectral radiometer onboard Huygens. Georg-August-Universität Göttingen, 2007.
- M. A. Tschimmel**, Investigation of the atmospheric water cycle on Mars by the planetary Fourier spectrometer onboard Mars Express. Georg-August-Universität Göttingen, 2007.

2006

- N. Bello González**, Spectropolarimetry of Sunspot Penumbrae. Georg-August-Universität Göttingen, 2006.
- M. Buske**, Dreidimensionale thermische Evolutionsmodelle für das Innere von Mars und Merkur. Georg-August-Universität Göttingen, 2006.
